Education

MIT Academy of Engineering — Pune, India
B.Tech in Computer Science and Engineering; CGPA (Current): 8.34/10 — August 2023 - Present

School of Scholars — Nagpur, India
HSC in CBSE; Percentage: 88.80% — June 2022 - March 2023

Experience

AI/ML Intern — **Jul 2026**
Jio Platforms Limited

- Designed and implemented a **Siamese Temporal Convolutional Network (TCN)** for multivariate time-series similarity learning.
- Developed modular preprocessing, feature engineering, and synthetic data generation pipelines for model training and evaluation.
- Implemented candidate filtering and an **MLP-based re-ranking** model to improve prediction performance.
- Trained and evaluated deep learning models using **PyTorch** with Top-k Accuracy, Precision, Recall, F1-score, and Mean Reciprocal Rank (MRR).

Projects

FusionArt Automated AWS Deployment Framework [GitHub] | *AWS, CloudFormation, EC2, Lambda, SQS, RDS, CloudFront, CI/CD* — **2026**

- Built a production-grade AWS infrastructure using **Nested CloudFormation Stacks** and Infrastructure as Code.
- Deployed a highly available architecture with **EC2 Auto Scaling**, Load Balancer, Amazon RDS, and CloudFront.
- Automated secure, zero-downtime deployments using an event-driven **CI/CD pipeline** with CodePipeline, Lambda, SQS, and Secrets Manager.

MediTrack [GitHub] | *Java, Spring Boot, React Js, JWT, MySQL, MicroServices* — **2025**

- Developed scalable **Spring Boot microservices** with MySQL for hospital management.
- Built a React.js frontend with **Role-Based Access Control** and GPS navigation using Leaflet.js.
- Implemented robust **REST APIs** for seamless communication between services.

FusionArt [GitHub] | *Java, Spring Boot, React.js, JWT, MySQL, Hibernate* — **2025**

- Developed a full-stack auction platform supporting concurrent real-time bidding.
- Designed a Spring Boot backend with automated PDF invoice generation and bidding workflows.
- Integrated secure wallet transactions, email notifications, and Hibernate-based persistence.

Achievements & Certifications

- Qualified **GATE 2026 (Computer Science)** with an **AIR 4391**.
- Achieved **Knight (1850+) on LeetCode**, demonstrating strong data structures and algorithms proficiency.
- Attained **3-Star (1600+) on CodeChef** with consistent performance in competitive programming.
- Solved **700+ DSA problems** across LeetCode, Codeforces, and CodeChef.

Technical Skills

Languages: Java, Python, SQL
AI/ML: Machine Learning, Deep Learning
Frameworks: Spring Boot, Hibernate
Databases: MySQL
Cloud: AWS

Extracurricular

- Participated in hackathons, ICPC, and inter-college programming contests.
- Active member of the CodeChef chapter, organizing coding events and contests.

Non-Technical Events:

- Active member of the CodeChef chapter, coordinating coding contests and fostering a competitive programming culture.
